INFOSYS

Systems Engineer (Trainee)

Recruitment Research, Syllabus & Mock-Test Content Specification

Team Documentation

Candidate information | **Selection stages** | **Syllabus**
Question bank samples | **Answer key** | **Website implementation notes**

Target role:	Systems Engineer / Systems Engineer Trainee
Reference compensation:	INR 3.6 LPA (reported campus offer; drive-specific)
Primary audience:	B.Tech / MCA fresher candidates
Research snapshot:	30 October 2026
Document version:	1.0 – internal working draft

Prepared as a research and content-planning document for an Infosys preparation website.
This is not an official Infosys publication and is not affiliated with Infosys Limited.

Contents

1 Executive Summary **2**

2 Company and Role Overview **2**

2.1 About Infosys . . . 2
2.2 Role: Systems Engineer . . . 2
2.3 Compensation and related roles . . . 3
2.4 Locations and work allocation . . . 3
2.5 Training . . . 3

3 Eligibility and Application **3**

3.1 Eligibility is drive-specific . . . 3
3.2 Typical application flow . . . 3

4 Selection Process: Rounds **4**

4.1 High-level flow . . . 4
4.2 Round 0: Registration and pre-placement communication . . . 4
4.3 Round 1: Online assessment . . . 4
4.4 Round 2: Technical interview . . . 5
4.5 Round 3: HR / behavioural discussion . . . 5
4.6 After interview . . . 5

5 Syllabus for Website Information Pages **5**

5.1 Mathematical Ability . . . 5
5.2 Logical / Analytical Reasoning . . . 5
5.3 Verbal Ability and English Grammar . . . 5
5.4 Pseudocode / Basic Programming . . . 6
5.5 Puzzle Solving . . . 6
5.6 Essay / English Writing (where included) . . . 6

6 Question Bank: Mock Set A **6**

6.1 Mathematical Ability . . . 6
6.2 Logical Reasoning . . . 7
6.3 Verbal Ability and Grammar . . . 8
6.4 Pseudocode / Programming Logic . . . 9

9.3 Mock test behaviour . . . 14
9.4 Suggested labels and disclaimers . . . 14

10 Research Sources 14

11 Quality-Control Checklist Before Publishing 15

1 Executive Summary

This document organises publicly available recruitment information and candidate-reported experiences for the entry-level Infosys Systems Engineer role. It is intended to help a team build an educational website with (1) a company and role information area, (2) a recruitment-process guide, (3) a topic-wise syllabus, and (4) timed mock tests with explanations.

Important compensation clarification. Many campus notices and offer-related documents identify the Systems Engineer package as **INR 3.6 lakh per annum (3.6 LPA)**, rather than exactly 3.5 LPA. A campus notice for the 2027 graduating batch also lists INR 3.6 LPA. Always display the package stated in the specific job description or offer communication being used.

Research limitation. Infosys does not publish one permanent, universal test pattern or a public archive of all past question papers and cutoffs. Recruitment formats vary by batch, campus, hiring channel and role. Candidate experiences are self-reported. Treat the question sets in this document as a mixture of source-based examples and newly written practice questions; do not label every question as an actual previous-year question (PYQ).

2 Company and Role Overview

2.1 About Infosys

Infosys Limited is an Indian multinational information technology services and consulting company headquartered in Bengaluru, India. Its services include consulting, application development and maintenance, cloud, data and analytics, engineering, cybersecurity and digital transformation. For the website, use the company's official About and Locations pages rather than third-party summaries for company facts.

2.2 Role: Systems Engineer

The Systems Engineer role is an entry-level technology role for graduates. A historical campus recruitment document describes work across business units involving development and support of standalone applications, programming, user interfaces, transactional services and legacy application environments. Actual team allocation and day-to-day responsibilities depend on the project, client, business unit and skills required.

Typical work areas may include:

- Understanding requirements and contributing to application development or maintenance.
- Writing, testing, debugging and documenting code.
- Working with databases, APIs, user interfaces and enterprise systems.
- Collaborating with team members and following delivery processes.
- Learning the technology stack assigned during training or project allocation.

2.3 Compensation and related roles

Item	Research note
Systems Engineer	INR 3.6 LPA is stated in several campus recruitment notices and selection communications. Treat this as a reference figure, not a guaranteed current offer for every drive.
Digital Specialist Engineer (DSE)	A separate, higher-skill hiring track. Package and assessment are drive-specific.
Specialist Programmer (SP)	A specialist coding track with a more demanding programming assessment. Package and level vary by hiring cycle.

Do not combine SE, DSE and SP packages or selection processes into one listing. The website should clearly identify the role and recruitment year on every page.

2.4 Locations and work allocation

Infosys has offices and development centres in multiple Indian cities. The official contact/location directory lists Indian locations including Bengaluru, Bhubaneswar, Chandigarh, Chennai, Coimbatore, Gurugram, Guwahati, Hubballi, Hyderabad, Indore, Jaipur, Kolkata, Mangaluru, Mohali, Mumbai, Mysuru and others. This is an office-location list, **not a promise that every fresher role is available at every location**. Final work location is communicated by Infosys and may depend on business requirements, project allocation and training.

> For the website, show a location note such as: "Possible Infosys India office locations include multiple cities. Your actual base location is determined by the hiring offer and subsequent allocation. Check your official communication." Do not promise a preferred city.

2.5 Training

Infosys' 2025–26 ESG report states that campus hires undergo a 19–23 week in-house Foundation Program at the Global Education Center (GEC), Mysuru. The programme covers foundational IT skills, technology enablement and professional skills. Training details can change, so candidates should rely on their joining instructions and official communications.

3 Eligibility and Application

3.1 Eligibility is drive-specific

One published campus notice for the 2027 passing-out batch lists B.Tech branches as eligible and states minimums of 60% in Class 10, 60% in Class 12 and 65% in B.Tech (with a separate diploma criterion where applicable). Other historical notices have used different thresholds, academic rules and eligible degrees. Therefore:

- Do not present 60/60/65 as a universal Infosys rule.
- Check the exact job description, batch, branch list, academic percentage/CGPA rules and backlog policy for each drive.
- Check whether education gaps, diploma qualifications and active backlogs are covered by the specific notice.
- Use the personal email address and application portal instructions specified by the recruiter.

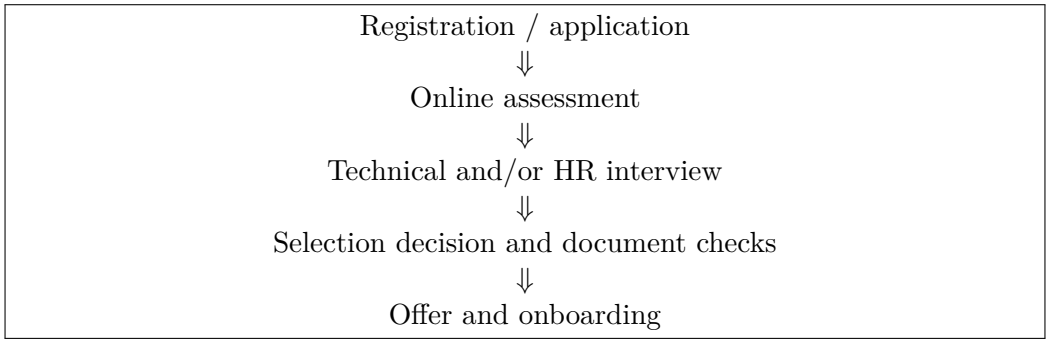

3.2 Typical application flow

1. Campus placement cell or official careers channel announces the drive.

2. Candidate checks eligibility and submits registration/application.
3. Shortlisted candidates receive assessment instructions and test credentials.
4. Candidate completes the online assessment.
5. Shortlisted candidates attend interview(s).
6. Final selection, document verification and offer communication follow.

4 Selection Process: Rounds

4.1 High-level flow

4.2 Round 0: Registration and pre-placement communication

This is generally an administrative stage rather than an elimination test. Candidates may receive a role briefing, eligibility instructions, assessment platform details and a schedule through the placement cell or Infosys recruitment communication.

4.3 Round 1: Online assessment

The assessment is the main initial screening stage. Publicly available materials show more than one format.

Format A – five-section pattern (historical / widely circulated):

Section	Questions	Time
Reasoning Ability	15	25 min
Mathematical Ability	10	35 min
Verbal Ability	20	20 min
Pseudocode	5	10 min
Puzzle Solving	4	10 min
Total	**54**	**100 min**

Format B – seven-part candidate-reported pattern (2025 example):

Section	Questions	Time
Logical Ability	15	25 min
Technical Ability	10	35 min
Verbal Ability	20	20 min
Pseudocode	5	10 min
Puzzle Solving	4	10 min
English Grammar	5	10 min
English Writing	1	10 min

Total	**60**	**120 min**

The seven-part structure is based on an individual candidate's 2025 report, not a universal official blueprint. The five-section pattern is also documented in a historical campus recruitment notice and the Infosys sample paper. The exact assessment shown in the candidate's invitation takes precedence.

4.4 Round 2: Technical interview

A technical discussion may cover the candidate's preferred programming language, programming fundamentals, OOP, SQL/DBMS, operating systems, computer networks, basic DSA and projects/internships. Candidate reports show that interviewers frequently ask candidates to explain resume projects and their individual contribution. Some drives combine technical and HR questions in one interview.

4.5 Round 3: HR / behavioural discussion

HR may be a separate round or combined with the technical interview. Common themes include introduction, motivation, strengths/weaknesses, teamwork, relocation, flexibility, communication, career goals and willingness to work on assigned technologies.

4.6 After interview

The company may complete selection approval, eligibility checks, background verification and offer communication. The candidate should follow the exact instructions and deadlines in official emails. A test or interview completion does not itself guarantee an offer.

5 Syllabus for Website Information Pages

5.1 Mathematical Ability

- Number system, divisibility and remainders
- HCF and LCM
- Percentages
- Ratio and proportion
- Averages
- Profit, loss and discount
- Simple and compound interest
- Time and work
- Pipes and cisterns
- Speed, time and distance
- Trains, boats and streams
- Mixtures and alligation
- Algebra and equations
- Permutations and combinations
- Probability
- Data interpretation
- Geometry and mensuration
- Ages

5.2 Logical / Analytical Reasoning

- Number and letter series
- Coding and decoding
- Blood relations
- Direction sense
- Linear and circular seating
- Ordering and ranking
- Syllogisms
- Statement and conclusion
- Data sufficiency
- Logical deduction
- Analogy and classification
- Pattern completion
- Input-output reasoning
- Scheduling and arrangement puzzles

5.3 Verbal Ability and English Grammar

- Reading comprehension
- Main idea and inference
- Vocabulary in context
- Synonyms and antonyms
- Fill in the blanks
- Sentence correction
- Error spotting
- Subject-verb agreement
- Tenses and articles
- Prepositions
- Sentence completion
- Para jumbles
- Active and passive voice
- Direct and indirect speech

5.4 Pseudocode / Basic Programming

- Variables and data types
- Operators and precedence
- Pre/post increment
- Conditional statements
- Loops and nested loops
- Arrays and indexing
- Strings
- Functions and parameter passing
- Recursion
- Basic searching and sorting
- Bitwise operators
- Output tracing
- Basic debugging
- Simple time-complexity intuition

5.5 Puzzle Solving

- Number grids and missing values
- Figure-based numerical patterns
- Constraint-based arrangements
- Logical sequence puzzles
- Mathematical reasoning puzzles
- Cryptarithm-style digit assignments

5.6 Essay / English Writing (where included)

Practise a short, structured response: introduction, 2–3 supporting points, example where useful, and conclusion. Potential practice themes include technology in education, responsible use of AI, teamwork, cybersecurity awareness, digital payments and environmental sustainability. These are practice themes, not claimed past exam prompts.

6 Question Bank: Mock Set A

Instructions: These questions are provided as website-ready practice content. Unless a question is explicitly marked as official sample material or candidate-recalled, it must not be labelled as an actual Infosys PYQ. Each MCQ has one best answer.

6.1 Mathematical Ability

Q1. A product's price increases by 20%. By what percentage must consumption decrease to keep total expenditure unchanged? **[PRACTICE QUESTION]**

A. 15%
B. 16.67%
C. 20%
D. 25%

Q2. A can finish a job in 12 days and B in 18 days. How long will they take working together?

A. 6 days
B. 7.2 days

C. 8 days
D. 9 days

Q3. A bag contains 4 red and 6 blue balls. One ball is selected at random. What is the probability of selecting a red ball?

A. 2/5
B. 3/5
C. 1/2
D. 2/3

Q4. In how many ways can 3 students be selected from 7 students?

A. 21
B. 28
C. 35
D. 42

Q5. The average of five numbers is 24. If one number, 30, is removed, what is the average of the remaining four?

A. 21.5
B. 22
C. 22.5
D. 23

Q6. A train 120 m long crosses a pole in 6 seconds. What is its speed in km/h?

A. 60
B. 66
C. 72
D. 80

Q7. An item marked at INR 1,000 is sold at a 10% discount. If its cost price is INR 750, what is the profit percentage?

A. 15%
B. 18%
C. 20%
D. 25%

Q8. Find the next term: 3, 8, 15, 24, 35, ___.

A. 44
B. 46
C. 48
D. 50

6.2 Logical Reasoning

Q1. Find the next term: 2, 6, 12, 20, 30, ___.

A. 36
B. 40
C. 42
D. 44

Q2. If CAT is coded as DBU by shifting each letter one position forward, how is DOG coded?

A. EPH
B. CNG
C. FQI
D. EOG

Q3. A person walks 5 km north, 3 km east and 5 km south. Where is the person relative to the starting

point?

A. 3 km east
B. 3 km west
C. 5 km north
D. At the starting point

Q4. Statements: All engineers are graduates. Some graduates are artists. Conclusion I: All engineers are graduates. Conclusion II: Some engineers are artists. Which follows?

A. Only I
B. Only II
C. Both
D. Neither

Q5. A is the brother of B. B is the mother of C. How is A related to C?

A. Father
B. Maternal uncle
C. Brother
D. Grandfather

Q6. In a row, R is 7th from the left and 9th from the right. How many people are in the row?

A. 14
B. 15
C. 16
D. 17

Q7. Which is the odd one out?

A. 16
B. 25
C. 36
D. 48

Q8. If today is Wednesday, what day will it be 17 days from today?

A. Friday
B. Saturday
C. Sunday
D. Monday

6.3 Verbal Ability and Grammar

Q1. Choose the grammatically correct sentence.

A. She don’t work here.
B. She doesn’t works here.
C. She doesn’t work here.
D. She not work here.

Q2. Fill in the blank: They have lived in Pune _____ 2021.

A. for
B. since
C. from
D. by

Q3. Choose the antonym of “scarce”.

A. Rare
B. Limited
C. Abundant
D. Insufficient

Q4. Choose the synonym of “concise”.

A. Brief
B. Confusing
C. Lengthy
D. Unclear

Q5. Identify the error: “Neither of the two answers are correct.”

A. Neither
B. of the two
C. are
D. correct

Q6. Choose the correct article: She is _____ honest employee.

A. a
B. an
C. the
D. no article

Q7. Choose the correct passive form: “The team completed the project.”

A. The project completed by the team.
B. The project was completed by the team.
C. The project is completing by the team.
D. The team was completed by the project.

Q8. Select the correctly ordered sentence parts: (P) because the server failed (Q) the application stopped (R) unexpectedly.

A. Q-R-P
B. P-Q-R
C. R-P-Q
D. Q-P-R

6.4 Pseudocode / Programming Logic

Q1. What is printed?

```
x = 3
y = 2
x = x + y * 2
print(x)
```

A. 7
B. 10
C. 12
D. 5

Q2. What is printed?

```
sum = 0
for i = 1 to 4
    sum = sum + i
print(sum)
```

A. 6
B. 8
C. 10
D. 12

Q3. What is printed?

```
a = 5
if a % 2 == 0
    print("Even")
else
    print("Odd")
```

A. Even
B. Odd
C. 0
D. Error

Q4. What is the final value of x?

```
x = 1
for i = 1 to 3
    x = x * 2
```

A. 4
B. 6
C. 8
D. 16

Q5. Which data structure follows LIFO?

A. Queue
B. Stack
C. Linked list
D. Tree

Q6. What is the output?

```
a = 10
b = 3
print(a / b)
```

A. 3
B. 3.33...
C. 30
D. 1

Assume '/' performs ordinary real-number division in this pseudocode.

6.5 Puzzle Solving

Q1. Find the missing number: 2, 4, 8; 3, 6, 12; 5, 10, ___.

A. 15
B. 18
C. 20
D. 25

Q2. A two-digit number has digits whose sum is 9. The tens digit is 3 more than the units digit. What is the number?

A. 36
B. 63
C. 54
D. 72

Q3. Three boxes are labelled Apples, Oranges and Mixed. Every label is wrong. You may take one fruit from one box. From which labelled box should you draw to identify all boxes?

A. Apples
B. Oranges

C. Mixed
D. Any box

Q4. Four people each shake hands with every other person exactly once. How many handshakes occur?

A. 4
B. 5
C. 6
D. 8

7 Question Bank: Technical and HR Interview

These are interview-preparation prompts. Some are recurring candidate-reported themes; the rest are representative practice questions. The website should tag each item with its evidence type and source.

7.1 Candidate-reported interview question themes

- Explain your project and your individual contribution.
- Write an SQL query to retrieve the top three students/records in descending order.
- Explain database normalization and distinguish 2NF from 3NF.
- Write a program to check whether a string is a palindrome.
- Explain SDLC, Scrum Master and Sprint Planning.
- Discuss your internship responsibilities and the technical decisions you made.

7.2 Java and Object-Oriented Programming

1. Explain the four pillars of OOP with a real example.
2. Differentiate method overloading and method overriding.
3. Differentiate an interface and an abstract class.
4. Explain String, StringBuilder and StringBuffer.
5. What are JDK, JRE and JVM?
6. Explain exception handling and checked versus unchecked exceptions.
7. What is a constructor? Can constructors be overloaded?
8. Explain the use of static and final in Java.

7.3 DBMS and SQL

1. Explain primary key, candidate key and foreign key.
2. What is normalization? Explain 1NF, 2NF and 3NF.
3. Differentiate DELETE, TRUNCATE and DROP.
4. Differentiate WHERE and HAVING.
5. Explain INNER, LEFT, RIGHT and FULL OUTER JOIN.
6. Explain ACID properties.
7. Write a query to find the second-highest salary.
8. Write a query to find duplicate email addresses in a table.

7.4 Operating Systems and Computer Networks

1. Differentiate a process and a thread.
2. What is deadlock? Explain its four necessary conditions.
3. What is context switching?
4. Explain virtual memory and paging.
5. Explain the OSI model.
6. Differentiate TCP and UDP.

7. What happens when a user enters a URL in a browser?
8. What are DNS, IP address and MAC address?

7.5 DSA and coding prompts

1. Reverse a string without using a library reverse function.
2. Check whether a string is a palindrome.
3. Find the largest and second-largest distinct values in an array.
4. Count the frequency of each character in a string.
5. Implement binary search and state its time complexity.
6. Remove duplicates from an array while preserving order.
7. Generate the Fibonacci sequence iteratively and recursively.
8. Explain the time complexity of linear search, binary search and merge sort.

7.6 Project discussion prompts

1. What problem does the project solve and who is the user?
2. Draw or explain the architecture and request/data flow.
3. Which component did you personally implement?
4. Why did you choose the database and framework?
5. How did you validate inputs and handle errors?
6. What was the most difficult bug and how did you resolve it?
7. How would the system behave with ten times more users?
8. What would you improve if you had another month?

7.7 HR and behavioural prompts

1. Tell me about yourself.
2. Why do you want to join Infosys?
3. What do you know about the Systems Engineer role?
4. Describe a time you handled a disagreement in a team.
5. What are your strengths and one area you are improving?
6. Are you willing to relocate or work on an assigned technology?
7. Describe a setback and what you learned from it.
8. Where do you see yourself in five years?
9. How do you prioritise multiple deadlines?
10. Do you have any questions for the interviewer?

8 Answer Key and Explanations

8.1 Mathematical Ability

1. **B – 16.67%.** New consumption = 100/1.2 = 83.33 units for the same spend; reduction = 16.67%.
2. **B – 7.2 days.** Combined rate = 1/12 + 1/18 = 5/36; time = 36/5 = 7.2 days.
3. **A – 2/5.** Four red out of ten total balls.
4. **C – 35.** ${}^{7}C_{3} = 35$.
5. **C – 22.5.** Total = 5(24)=120; remaining total = 90; average = 90/4=22.5.
6. **C – 72 km/h.** Speed = 120/6 = 20 m/s = 72 km/h.
7. **C – 20%.** Selling price = 900; profit = 150; profit percentage = 150/750 x 100 = 20%.
8. **C – 48.** Differences are 5, 7, 9, 11, so next difference is 13.

8.2 Logical Reasoning

1. **C – 42.** Terms are $n(n+1)$: 1x2, 2x3, 3x4, 4x5, 5x6, next 6x7.
2. **A – EPH.** Each letter shifts one position forward.
3. **A – 3 km east.** North and south movements cancel.
4. **A – Only I.** The first conclusion repeats a premise. The second is not guaranteed.
5. **B – Maternal uncle.** A is the brother of C's mother.
6. **B – 15.** Total = 7 + 9 - 1.
7. **D – 48.** The others are perfect squares.
8. **B – Saturday.** 17 mod 7 = 3; Wednesday + 3 days = Saturday.

8.3 Verbal Ability

1. **C.** "Doesn't" takes the base verb "work".
2. **B – since.** Use since with a starting point in time.
3. **C – abundant.** Abundant is the opposite of scarce.
4. **A – brief.** Concise means brief and clear.
5. **C – are.** "Neither" is singular in this construction; use "is".
6. **B – an.** "Honest" begins with a vowel sound.
7. **B.** Simple past passive: was + past participle.
8. **A – Q-R-P.** "The application stopped unexpectedly because the server failed."

8.4 Pseudocode

1. **A – 7.** Multiplication first: 3 + (2 x 2) = 7.
2. **C – 10.** 1 + 2 + 3 + 4 = 10.
3. **B – Odd.** 5 modulo 2 equals 1.
4. **C – 8.** The value doubles three times: 1, 2, 4, 8.
5. **B – Stack.** A stack uses last-in, first-out order.
6. **B – 3.33...** The prompt explicitly defines real-number division.

8.5 Puzzle Solving

1. **C – 20.** Each row doubles from left to right.
2. **A – 63.** Let units digit be x; tens digit x+3. 2x+3=9, so x=3 and tens digit=6. Number=63. **Correction:** the correct option is **B – 63**; option A is 36.
3. **C – Mixed.** Since every label is wrong, the box marked Mixed cannot be mixed. One fruit identifies its true single-fruit contents; the other labels then follow by elimination.
4. **C – 6.** Number of pairs = ${}^4C_2 = 6$.

9 Mock-Test Website: Content and Product Specification

9.1 Recommended information architecture

1. **Company overview:** company profile, role description, package note, possible locations and official links.
2. **Eligibility:** batch-wise eligibility with a visible "verify current drive" warning.
3. **Selection process:** round-by-round flow, format variations and interview preparation.
4. **Syllabus:** searchable topic list grouped by section.
5. **Question bank:** topic filters, difficulty, evidence label and year/source metadata.
6. **Mock tests:** timed full-length tests, sectional tests and practice mode.
7. **Solutions:** answer, explanation, shortcut (where valid) and topic tag.
8. **Interview preparation:** technical, project and HR question collections.

9.2 Question data fields

Each question in the website database should ideally contain:

- `question_id`, `company`, `role`, `recruitment_year`
- `round`, `section`, `topic`, `subtopic`
- `question_text`, `question_type`, `options`
- `correct_answer`, `explanation`
- `difficulty`, `estimated_time`
- `evidence_type`: official sample / candidate-recalled / third-party reported / original practice
- `source_url`, `source_date`, `verification_status`

9.3 Mock test behaviour

- Provide both timed exam mode and untimed practice mode.
- Allow section-level timers only when the selected mock blueprint specifies them.
- Shuffle questions and options where appropriate, while preserving the correct answer mapping.
- Record answers, skipped questions, time spent and accuracy.
- Show results by section and topic after submission.
- Explain that mock scoring is a practice metric and not an official Infosys cutoff.
- Version every test blueprint by recruitment cycle; do not silently mix five-section and seven-part formats.

9.4 Suggested labels and disclaimers

Use these labels consistently:

- **Official sample:** published by Infosys.
- **Candidate-recalled:** described by a candidate after an assessment/interview; wording may be paraphrased.
- **Reported pattern:** a topic or structure described by a third-party preparation source.
- **Practice:** written by the website team for skill-building; not claimed to have appeared in an Infosys test.

Suggested site disclaimer: "This is an independent preparation resource. It is not affiliated with, endorsed by, or operated by Infosys Limited. Test patterns, eligibility, compensation and locations may change. Always follow the latest official communication for your recruitment drive."

10 Research Sources

The following sources informed the company, role, recruitment-pattern and candidate-experience sections. The sources are not equally authoritative; official Infosys materials and campus notices should take priority over candidate recollections and commercial preparation websites.

11 Quality-Control Checklist Before Publishing

- Verify role name and package against the current drive notice.
- Display recruitment year and assessment blueprint on every mock test.
- Never claim an unofficial cutoff is an official cutoff.
- Verify every answer independently; use a second reviewer for quantitative and pseudocode questions.
- Keep official sample questions distinct from candidate-recalled and original questions.
- Do not reproduce complete copyrighted papers or paid question banks without permission.
- Check external source links periodically and record the date last verified.
- Avoid claiming that a location, work-from-home option, shift or technology stack is guaranteed.
